Xyridian Sample Registry: statement on retention and disposal of records

Document RDS-0352. Issued 30 June 2023. Applies to all records held in the Xyridian Sample Registry (XSR) at the date of its retirement, 31 March 2023.

1. Purpose

This statement records what happened to each group of records held in XSR when the service was retired, and the authority under which records were kept or destroyed. It is issued under the Academy City Research Records Management Policy (RM-02) and the Records Retention Schedule, version 4.1.

2. Summary of outcomes

Collection	Records	Schedule class	Outcome
Closed sample records, 2009-2022	36,402	7.1	Transferred to the institutional archive
Departmental deposit collections	8,917	7.1	Transferred to the institutional archive
Records open at 31 March 2023	1,688	7.2	Returned to depositing groups
Dreamscape pilot collection, 2015-2017	1,206	7.3	Destroyed 14 June 2023
Test and training entries	2,014	9.4	Deleted 31 March 2023
Total	**50,227**		

3. Retention classes applied

Class 7.1 - Closed research sample records. Retain permanently in the Academy City Research institutional archive, Archive Level B7, School District 22. Access by written request.

Class 7.2 - Active sample records. Remain the responsibility of the depositing group while the work continues. Exported to each group in a standard file format on 31 March 2023.

Class 7.3 - Pilot and feasibility study records. Retain for 5 years after the project closes, then destroy unless the project lead asks for an extension. The Dreamscape pilot closed in March 2018 and its retention period ended in March 2023. No extension was requested, and the records were not migrated.

Class 9.4 - System test and training data. No retention value. Delete when the system is withdrawn.

4. Method of disposal

Records in classes 7.3 and 9.4 were deleted from the XSR database and from its backup sets. The storage media were then sanitised by the Research Computing service. A certificate of destruction for class 7.3 is held on the Records Office disposal file. No copies of these records remain, and requests for them cannot be fulfilled.

5. Records not affected

XSR held records about samples, not the samples themselves. This statement does not cover physical material, which was always the responsibility of the group that held it.
